Ceiling Supports 12/03/2025

SPLUS Omega Channel

1/4

Description

Channel with omega profile and universal connection system for Rejiband® and Pemsaband® trays. It allows you to configure different structures individually or with the help of omega SPLUS brackets to support wall or ceiling mounted tray with a threaded rod. Available in lengths of 1000, 2000 and 3000 mm. Made of steel in various Protection Systems.

Advantages

Click system allows fast connection of the wire mesh tray without the need of fixings. Greater economy and quick assembly.

Due to its dimensions and very versatile structure, it can be used in ceiling mounts as a suspension for several trays on the same line.

Performance is increased by 20% when used as a suspension or as a wall mounted rail with other brackets attached.

CE conformity to directive 2014/35 / EU.

Available in PG and GC protection systems.

Applications

Suitable for the creation of support structures for installations of Rejiband® and Pemsaband® trays in the management of electrical wiring and / or telecommunications in the tertiary sector.

Solutions
